

Mathematical Concepts

Dirac Notation(or Bra-Ket Notation)

Terminology: ket of A is $|A\rangle$ and bra of A is $\langle A|$. Example, let $\Sigma = \{A, B, C\}$

then $|A\rangle = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$, $|B\rangle = \begin{bmatrix} 0 \\ 1 \\ 0 \end{bmatrix}$ and $\langle A| =$

$(1, 0, 0)$, $\langle B| = (0, 1, 0)$ Note that $|\Psi\rangle$ then $\langle \Psi| = |\Psi\rangle^T$.

Cartesian product

Let $y = \{0, 1\}$ and $x = \{a, b\}$. Then,
 $x \times y = \{(0, a), (0, b), (1, a), (1, b)\}$
and $y \times x = \{(a, 0), (a, 1), (b, 0), (b, 1)\}$

Tensor Product of vectors

$$\begin{bmatrix} a_0 \\ \vdots \\ a_n \end{bmatrix} \otimes \begin{bmatrix} b_0 \\ \vdots \\ b_n \end{bmatrix} = \begin{bmatrix} a_0 b_0 \\ \vdots \\ a_n b_n \end{bmatrix}$$

Tensor Product Properties

- $(|\phi_1\rangle + |\phi_2\rangle) \otimes |\psi\rangle = |\phi_1\rangle \otimes |\psi\rangle + |\phi_2\rangle \otimes |\psi\rangle$
- $(a|\phi\rangle) \otimes |\psi\rangle = a(|\phi\rangle \otimes |\psi\rangle)$
- $|a\rangle \otimes |b\rangle = |b\rangle \otimes |a\rangle$

Quantum Information Systems

Quantum State Vector

Quantum State of a system is represented by a complex column vector. Let the quan-

tum state vector v be equal to $\begin{bmatrix} a_0 \\ \vdots \\ a_n \end{bmatrix}$, where

$\sum_{i=0}^n |a_i|^2 = 1$ The **euclidean norm** of the $||v|| = \sqrt{\sum_{i=0}^n |a_i|^2}$

Common Quantum States

<i>code</i>	<i>description</i>
Plus State	$ +\rangle = \frac{1}{\sqrt{2}} 0\rangle + \frac{1}{\sqrt{2}} 1\rangle$
Minus State	$ -\rangle = \frac{1}{\sqrt{2}} 0\rangle - \frac{1}{\sqrt{2}} 1\rangle$
Other State	$\frac{1+2i}{3} 0\rangle - \frac{2}{3} 1\rangle$
